- Sedation for routine dental rasping isn't included in plans 1, 2 and 3 and so would be an additional charge if your horse needs sedating.
- Should your horse require more advanced dentistry work, this again would be charged additionally.
- Worm egg count and blood results for the tapeworm tests will be reported, if the results are positive, we will advise you on appropriate treatment.
- The lameness evaluation involves trotting your horse up and is purely an evaluation. If your horse is lame and further diagnostic tests are required, these will carry an additional charge.
- 5% discount is included on medications if your horse requires them on a long term basis.
- Visits have to be pre-booked 5 working days in advance.
- The plans will be registered to a specific horse that you own.
